

## SUNSHINE RIFTS BREAK RAINFALL

Rancher Sees Precipitation  
Simultaneously in  
Six Different  
Places

### NO NATURE FAKING

While the "rainy season" has not yet begun according to the Indian sign of rain, "raining all around and pouring down in the middle," the season has begun in cross sections according to a rancher from the Sulphur Springs valley, who yesterday averred that he saw it raining in six different places at the same time, all six showers being separated by rifts of sunshine.

The rancher is likely to regard this story as a piece of nature faking but any rancher will confirm it. It is an inspiring spectacle and an unusual phenomenon in any other part of the country, where rains are more or less general. In the Sulphur Springs valley, however, it may rain in six different places all within a radius of twenty-five miles. From a distance the phenomenon resembles a big water sprinkler pouring water from the sides and every shower is perfectly defined and separated by a rift of sunshine.

The peculiarity about the beginning of the season this year is that all of the rain that has fallen has come out of the east. Reports from the west of the divide are to the effect that no rain has fallen in the hills or on the western slopes yet. The most destructive of rain storms of the past have come from the west and last year local rain storms west of the divide wrought much damage early in the rainy season.

### Hard to Make It Stronger.

"But, my dear sir, your play does not even touch the chords of humanity," remarked a theatrical lessee, referring to a comedy that he had designed to scan. "What? No human touch? Great Scott!" exclaimed the dramatist. "And the hero is always borrowing money from his friends!"

## CUPID LOAF; WEATHER HOT

June Brides Rare in District; Love Thrives When Thermometer Drops

### WEDDING MART DULL

A startling and discouraging falling off in the number of marriages in the district is reported by justices of the peace and others who are qualified to perform the marriage ceremony. June is the month of weddings but a census made yesterday developed the fact that there has not been an ordinary spur-of-the-moment wedding in the district this month, and the month is two-thirds gone.

The month of June earned its sobriquet of Month of Marriages not from the formal, stately church weddings but from the weddings that solve the barb of Cupid's arrows, when impaled youths and maidens are "winged" impulsively by an arched neck, a neat ankle, a stray wisp of hair, the ripple of a laugh and other frothy nothings that are peculiar to June and thereby comes the plume name of June.

The fact that the high record for several years was established in the winter gives the June scarcity a significance that may supplant June as the Month of Weddings and give December that favored position on the calendar.

### Brief Local Items

#### Son Born

Born to Mr. and Mrs. Quinn, of Youngblood, hill, on June 19, a son.

#### Judge Thomas Seriously Ill

Judge H. E. Thomas, city court interpreter, is threatened with paralysis, according to a telegram from Frank Thomas yesterday. The interpreter will be in Globe until the last of next week.

#### California Officer Ill

Deputy Sheriff J. J. Henry of Los Angeles county, California, who came here to get Joe Dierksen, wanted in that county on the charge of passing bad checks, was unable to leave for Los Angeles with his prisoner yesterday morning on account of illness, but will get away this morning.

#### Newlyweds Arrive

Mr. and Mrs. J. W. Kennedy arrived in the city yesterday morning from El Paso, where they spent several days, en route from Nacogdoches, Texas, to Bisbee. They were married at the first named place, the bride, formerly Miss Wade, being a resident of that place.

#### Moulier Improving

The condition of T. A. Moulier, who has been in the county detention hospital for several weeks, ill of smallpox, is improving every day, said Dr. C. H. Hunt, city and acting county health officer, yesterday.

## STORM ISOLATES BISBEE: WIRES DOWN

Heavy Storm in Vicinity of Benson Evident of Interruption

Bisbee was an isolated section of Arizona last night, beginning about 9:30 o'clock, when the telephone line of the Mountain States Telephone company between Bisbee and Benson went dead, due to a terrific storm somewhere between Bisbee and Tucson, and probably in the vicinity of Benson.

The lines of the Western Union telegraph company went dead at 7:19 o'clock, due to the same cause, and no communication could be established with the west. It was nearly midnight that Bisbee was placed in communication with Chicago and civilization, when The Review began receiving dispatches from the Chicago office of the Associated Press, relayed by way of El Paso.

Communication with the outside world under this arrangement, however, hung by a single wire into El Paso. Bisbee's only neighbor was Tombstone, with which there was telephone connection, and Bisbee was the only place from which the county seat was not cut off completely. Bisbee and Douglas were as far apart, so far as communication was concerned, as if they had been a thousand miles apart, there being neither telephone nor telegraphic communication.

Owing to the lack of the usual modes of communication, no news whatever concerning the storm that interrupted telephone and telegraph

### Deafness Cannot Be Cured

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a running ear or a deaf ear, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; it does not cure out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

## \$2000 FOR OIL ON NACO ROAD

City Council Decides to Improve Highway; Slag Paved Street Also

### CORPORATIONS AID

Two thousand dollars from the street improvement fund of the city was appropriated by the city council last night at a special meeting for the oiling of Naco road from the city limits on the east to the point of beginning of the brick pavement on Naco road just in front of the city hall.

Data on the amount of oiling that would be necessary, cost, etc., was submitted by Chairman J. W. Kinney, of the street committee and submitted to the council. There is 6,300 square yards of road surface in that section of the road, and Chairman Kinney estimates that this can be oiled for about \$2,000, basing his estimate upon a tentative bid furnished by W. M. Adamson, of Scott and Adamson, contractors who have the contract for oiling the road from the eastern city limits of Bisbee to the Bisbee-Douglas highway below Lowell.

The work that the contractors offer to do on the city road is the same as they are doing on the county road in the composition of the road surface, and the offer to crown the road and repair it all the way for an additional cent and quarter per square yard. The oil that the contractors will agree to use is 80 per cent asphaltum oil.

The tentative proposition made by the firm, through Mr. Adamson, provided for harrowing the road for a depth of two and a half inches. Mr. Adamson stated that experience had proven that it was economy to put on a thin oiled surface as otherwise the road surface would tend to roll, having more leverage than on a two and a half inch surface. This is the depth of oiled crest on all California roads, according to Mr. Adamson.

Quick was the only councilman to oppose action in the matter, attempting to get through a motion to "take it under consideration" but the motion failed to receive a second. Kinney offered a motion authorizing the expenditure of \$2,000 for oiling 6,300 square yards of road surface on Naco road between the eastern city limits and the city hall, and authorizing the mayor and the city engineer to prepare specifications and advertise for bids on the work. The entire matter was placed in the hands of these two officials with power to act.

When the mayor put the question of the appropriation to a vote, Councilman Quick called for the roll call, which resulted as follows: Adamson, Hill, Kinney, Warmington and Williams. Noel Quick. Absent, Hennessy.

The mayor called the attention of the council to the fact that the rainy season was approaching and that it might be well to take some action regarding the street between the Phelps Dodge store and the Copper Queen general office building. The advice of Mr. Adamson was asked on the use of slag as a paving material, and he said that his experience as mayor of Douglas was that for city or county roads it was good, and would serve as well as brick. J. M. O'Connell, of the legal department of the Warren-Bisbee railway, was present, and stated that he felt sure the company would haul free of charge all slag that would be needed for such work, which statement was supported by Jesse Younk, superintendent of the railroad. J. M. O'Connell, in this connection, also said that it was the intention of the company to ballast the entire trackage of the street railway in the city.

The matter of using slag from the slag dump and their cooperation in the plan of paving this piece of road with slag, will be taken up by Mayor Williams with officials of the two companies at an early date, and a special meeting of the council will be called to take action in the matter.

Dr. N. C. Blodgett, district supervisor of the Borderland route, was present, and when asked by the mayor if he had anything to say on the matter of good roads, he responded with congratulations to the mayor and the council for the progressive step taken. Will Solomon, of the Commercial club, also congratulated the council. There were a number of prominent business men and members of the Commercial club present at the meeting.

Permission was granted the Phelps Dodge store to construct a sidewalk along the north side of the store and warehouse, three feet wide and from eight to ten inches above the surface of the road. Only Councilman Quick opposed giving permission for constructing the sidewalk.

service could be obtained, but the totality of its work in this regard may indicate that heavy damage has been wrought in the vicinity of Benson, all wires into that town being down. Bisbee received the crumb of the storm that wrought such heavy damage to the west of the city, and swiftly gathering clouds broke in the heaviest rain of the season at 7:15 o'clock last night.

### Cheerfully Subscribed.

Mrs. Cheep—Charlie, what do you think? Did just sent you a \$1.00 check for our new baby! Wasn't that good of him? Mr. Noopy—"I should say so! I'll write at once and thank him for his contribution to the Fresh Hair Fund."—Judge.

**8 MONTH SCHOOL PROVIDED BY LAW**

New Regulations Provide for Longer Term if Finances Will Permit

In a circular letter addressed to school trustees, County School Superintendent H. H. Hotchkiss, outlines the changes made in the school laws of Arizona, effective by virtue of the passage of the new school law on May 13, 1912.

The most important change, of course, is in the segregation of pupils of the African race and the local school board are now working on plans to carry this provision into effect.

The new law prohibits the employment as teacher or in any capacity, a relative of any member of the school board, except by unanimous consent of all members of the board.

Section 55 provides that all school money received by apportionment from the county or state during the year, must be expended for salaries and contingent expenses only, but if there is a balance after all expenses for running the school eight months have been paid, the money may be used for discharging debts of the previous year or in purchasing furniture, in making repairs on school buildings or improving school grounds but may not be used in paying interest or principal on the bonded debts of the district or in purchasing lands for school purposes.

On the first day of July of each year school trustees are required to file with the county superintendent itemized estimates of running the schools the ensuing year and the estimate will be transmitted to the board of supervisors. On or before the first day of August of each year the county superintendent is required to furnish the board of supervisors an estimate of the minimum amount of school funds needed for the ensuing year. This estimate is obtained by multiplying \$35 by the average attendance of the schools for the first eight months of the previous session, with the addition of 10 per cent which shall be a reserve fund. No district apportionment, however, will be less than \$1,000.

If the county superintendent's estimate, thus obtained, falls short of the amount of money needed by any district, he must include the excess in his estimate to the board of supervisors and the board can not reduce the estimate unless it exceeds ninety cents on the one hundred dollar valuation of property.

**MOVED TO LOWELL**

I have moved my stables from Naco to Lowell and am located at the Cowboy Corral where I will welcome my old friends and new ones also.

### TROOPS K. AND M. FOURTH CAVALRY

will give a farewell dance at the Pomeroy Resort Saturday night, June 22nd, 1912. These troops are leaving for border duty and wish to show their good will and appreciation to the people of the Warren District.

The dance will be in full dress uniform. There will be no charge. You and your friends are invited.

## THOMPSON QUILTS ARIZONA COPPER

Ends Long Service at Clifton July First; Future Plans Not Given Out

CLIFTON, June 21.—A. T. Thompson has resigned his position with the Arizona Copper company, Ltd. His resignation was called this week to the directors of the company in Edinburgh, Scotland, to take effect July 1st, 1912, or as soon thereafter as his successor may be appointed.

When seen at his office Thursday Mr. Thompson confirmed the report to a representative of the Era, and made the statement that he expected to leave Clifton shortly after July 1st. "At the present time I am not at liberty to state what corporation I will be associated with in the future," said Mr. Thompson. "This reticence on my part is caused by the request of my new employers but it will not be a secret for long. I sincerely regret leaving Clifton. My association here with the people of the Clifton-Morenci district, and with the A. C. company, has been most pleasing. Clifton has been my home for fifteen years and it will always be "home" to me, but I would be doing myself an injustice to refuse this new offer which has come to me unsolicited and entirely unexpected.

A. T. Thompson has been cashier of the A. C. company, Ltd., and general superintendent and traffic manager of the A. & N. M. Railway. He came to Clifton from Edinburgh, in December, 1896, as bookkeeper for the company and his service has been continuous since that time, being steadily advanced from one important position to another. Mr. Thompson enjoys the high esteem of the public in general who have come in contact with him all these years and numerous regrets have been expressed on all sides since it became known that he intended to leave.
